If it's worth doing,
it's worth saving

The Original Superfloppy Drive

70 floppies with your valuable files fit onto 1 Zip 100MB disk, that's why more than 30 million drives and 180 million disks have been sold. The affordable classic Zip 100MB drive is used like a floppy, but works like a hard drive. Just connect it to your desktop and load the Iomega software – it's as simple as that.

Convenient connections for your computer

The Zip 100MB Parallel Port drive connects to all Windows 95/98 and NT enabled PC's. Complete with pass-through feature, you can connect both your Zip 100MB Parallel Port drive and printer to the same Parallel Port interface. The Zip 100MB USB drive connects to any USB enabled desktop or notebook computer. An internal (ATAPI) drive is also available.

Save, transport, share and secure valuable files

Zip disks provide safe and affordable storage for your important files. Use them to secure data whenever you want. Take hundreds of megabytes of data home, on the road, to the next office. Or, you can overnight large files to remote co-workers and outside business partners.

What can you do with Zip® drives and disks?

If you need more disk space, carry around lots of data, like to work at home or on the road, or share files with partners, a Zip® drive is an essential tool. Here are just a few of the things you can do with your Zip® disks:

capture

- Internet downloads
- 300 to 800 digital images
- Up to 100 minutes of MP3 audio on a single 100MB Zip disk![†]

create

- An automatic backup of your important files using Iomega® QuikSync software
- Copies of your best work
- An archive for all your files[†] (e-mail, client files, pictures, audio and video clips)

connect

- And share information with co-workers, clients, and service bureaus
- To 30 million Zip® drives sold worldwide

QuikSync *Besides creating new files, always back up your work using Zip. Iomega QuickSync is the easiest to make an automatic and simultanous back up of your important files.*
